

three, two, one- ignition!

Reading and research place for young explorers and their brilliant ideas. Pull up and go round with this eye-catcher in your kids' library. The 3 circular workstations are separated from one another by the rocket body and each has a sufficient size for two persons to work on it at the same time.

The rocket can be placed free-standing and be randomly equipped with thought-out accessories for each individual mission. As an example, you can create suitable internet research workstations for kids by using integrated computer boxes, or build a significant reading landscape with a central table through combining it with picture book boxes.

Combination sample Reading Rocket

Traffic white [1]

Flame red [2]

Ice blue [3]

Olive wood decor [4]

Please add selected code to the last digit of the Order No.
