

WOW! Presentation Table

This multiple table series is the perfect marketing for your library. Three table heights compose the flexibly playable stage for your presentation. Two-step combinations can be placed at the wall; double-sided steps can be arranged free-standing (see picture). We staggered the table lengths of this modular system in steps of 10cm and adapted them for each other so that the lower table is 10cm shorter and can be inserted underneath the larger table. The partition walls can be contrasted in colour, and can also be equipped with graphics or lettering for accentuating the piece of furniture as can the frontal sides. There is also the option to combine the WOW! presentation table with book stands on a presentation board at the frontal side (see picture).

Presentation System WOW!

A library is life, a real world with encounters, communication, events and culture – with a special architectonic aspiration as decisive factor for an inspiring location. It is inviting, shows what it has and does not only offer the possibility to read and learn, but at the same time is the meeting point of the community or school: a library is life!

Get your inspiration from our enthusiasm for libraries. Because we already think about the functions of tomorrow's libraries. Discover new ideas for presenting your media. Give your media stock a stage. Show what is important to you and advertise your novelties. Media in a library are usually small. We have new presentation furniture to make it big with....

Mobile Seating and Presentation System MIKADO

A sculpture, generous presentation space, variable seating accommodation, and all that in one piece of furniture?

MIKADO is surprising on several levels. It attracts the views, but does not block the overview which is similarly important for the room impression of your users.

The three-part system consists of two boxes which are combined through swivel joints via a stacked frame. The boxes on wheels serve for presenting media and can also be used for sitting and cross-reading.

The frame offers additional presentation options for media or graphics and labelling.

In case you need this piece of furniture for an event, simply turn the frame onto one of the two boxes and move it piggy-back with the box.

MİKADO Frame

WOW! Multi-Storey Table with Platform

It invites you to playing with different types of presentations, frontal, slanted or with decoration. This piece of furniture takes advantage of the so-called „arena effect“ with its ascending presentation towards the back. Presentation heights H 300/600/900 mm. Available on wheels or equipped with a base.

Veneered wood/plastic coated, board thickness 38 mm, D 325 mm on stands, lacquered metal.
