

# Book Trolleys ERGO-LINE

As a book trolley can become one of the most important tools of a library employee, it is very important to integrate aspects of industrial medicine into the design. Particular attention was directed to the handle of this series.

In order to keep the limits of so-called joint limiting angles of hand and shoulder joints, our Ergo-Line handle was designed as continuous curved handle and fosters a dynamic hand-reach through changing positions.

- Frames from round tubes, 25 mm diameter, and four wheels with 100 mm diameter and with all-purpose treads from grey rubber.

**Ergo-Line Book Trolley with three Wooden Boards, WE 1**  
Boards and side panels from veneered wood/plastic coated, 1 2 3
